

CATS Farigaig Forest School

Plan showing marginally expanded footprint to include connector strip between the two pieces of land to the south of the road being the former site of the shed.

Below – The plan produced by Forestry and Land Scotland some time ago.

This rectangle arrowed is the site of the totally demolished shed /bothy. At the moment it is excluded from the area which we are planning to purchase. This may be unfortunate as if we are make best use the Fasnagruig (larger) area – then it cannot easily be accessed direct from the forest classroom building or carpark without using the public road.

Amended plan for consideration
By including the site of the former shed/bothy, the two pieces of land are linked and become more useful.
