Map annotations

- overhead powerline cuts through forest
- podzolic soils, abundant heather and spruce in check
- Storm Arwen windblow damage still present
- Active quarry but poor quality roadstone
- soils are mostly gley with some pockets of brown earth and podzol soils and predominantly planted with Sitka spruce
- Mill Dam heritage feature
- Progressive wind damage along this edge of the forest, especially on wetter gley soils as neighbouring forest is felled.
- Dam requires maintenance and vegetation control
- Good forest road network within the forest, popular for dog walking and horse riding. Core path in Gorthy Wood
- A number of water courses and water bodies within the forest under dense conifer plantation
- Water supply for Loch Horn Cottage
