

During the thinning operations the majority of safe veteran trees will be retained. The thinning intensity will be varied across the block to increase its structural diversity.

The majority of the block will be managed under LISS (Low impact silvicultural system) with the aim of maintaining the current species and structural diversity.

Clearfelling of unstable crops of Norway Spruce on wet ground will be planned for the first half of the plan period.

- Dunnottar wood
- Watercourses
- Powerline
- Forest road
- Phase 1 felling (2014 - 2018)
- Low impact silvicultural system
- Open/other land
