Transfer of Cailhallan Wood

The Coilhallan Wood is used by the locals and the visitor for it's peaceful low level walks, enjoyed by dog walkers and runners and it's litter free. There is not disruption to the residents in the area. It's great for older active adults and it's safe. The Wood provides home to woodland habitats without any disruption.

I object to transfer of Coilhallan Wood.

The study presented by CCDT doesn't reflect on current or future economic climate, nor needs of community of the Callander, the funding in long term is NOT sustainable. The support for woodland habitats can't be achieved with mobile café and extra litter. Extra trails for mountain bikes don't compliment any improvements to the wood either. In the short future the only point of sale will be the timer sale which will destroy Coilhallan Wood in long term and leave CCDT with no other financial aid.

As a resident and regular user of the Coilhallan Wood with understanding of business needs the study is not sustainable and doesn't support real needs of the area. The FLS ownership and management is imperative for the area. The CCDT should entre into agreement with FLS to create opportunities to develop the area.

Kind regards,
