

## Moray & Aberdeenshire Forest District **Roseisle**

### Thinning

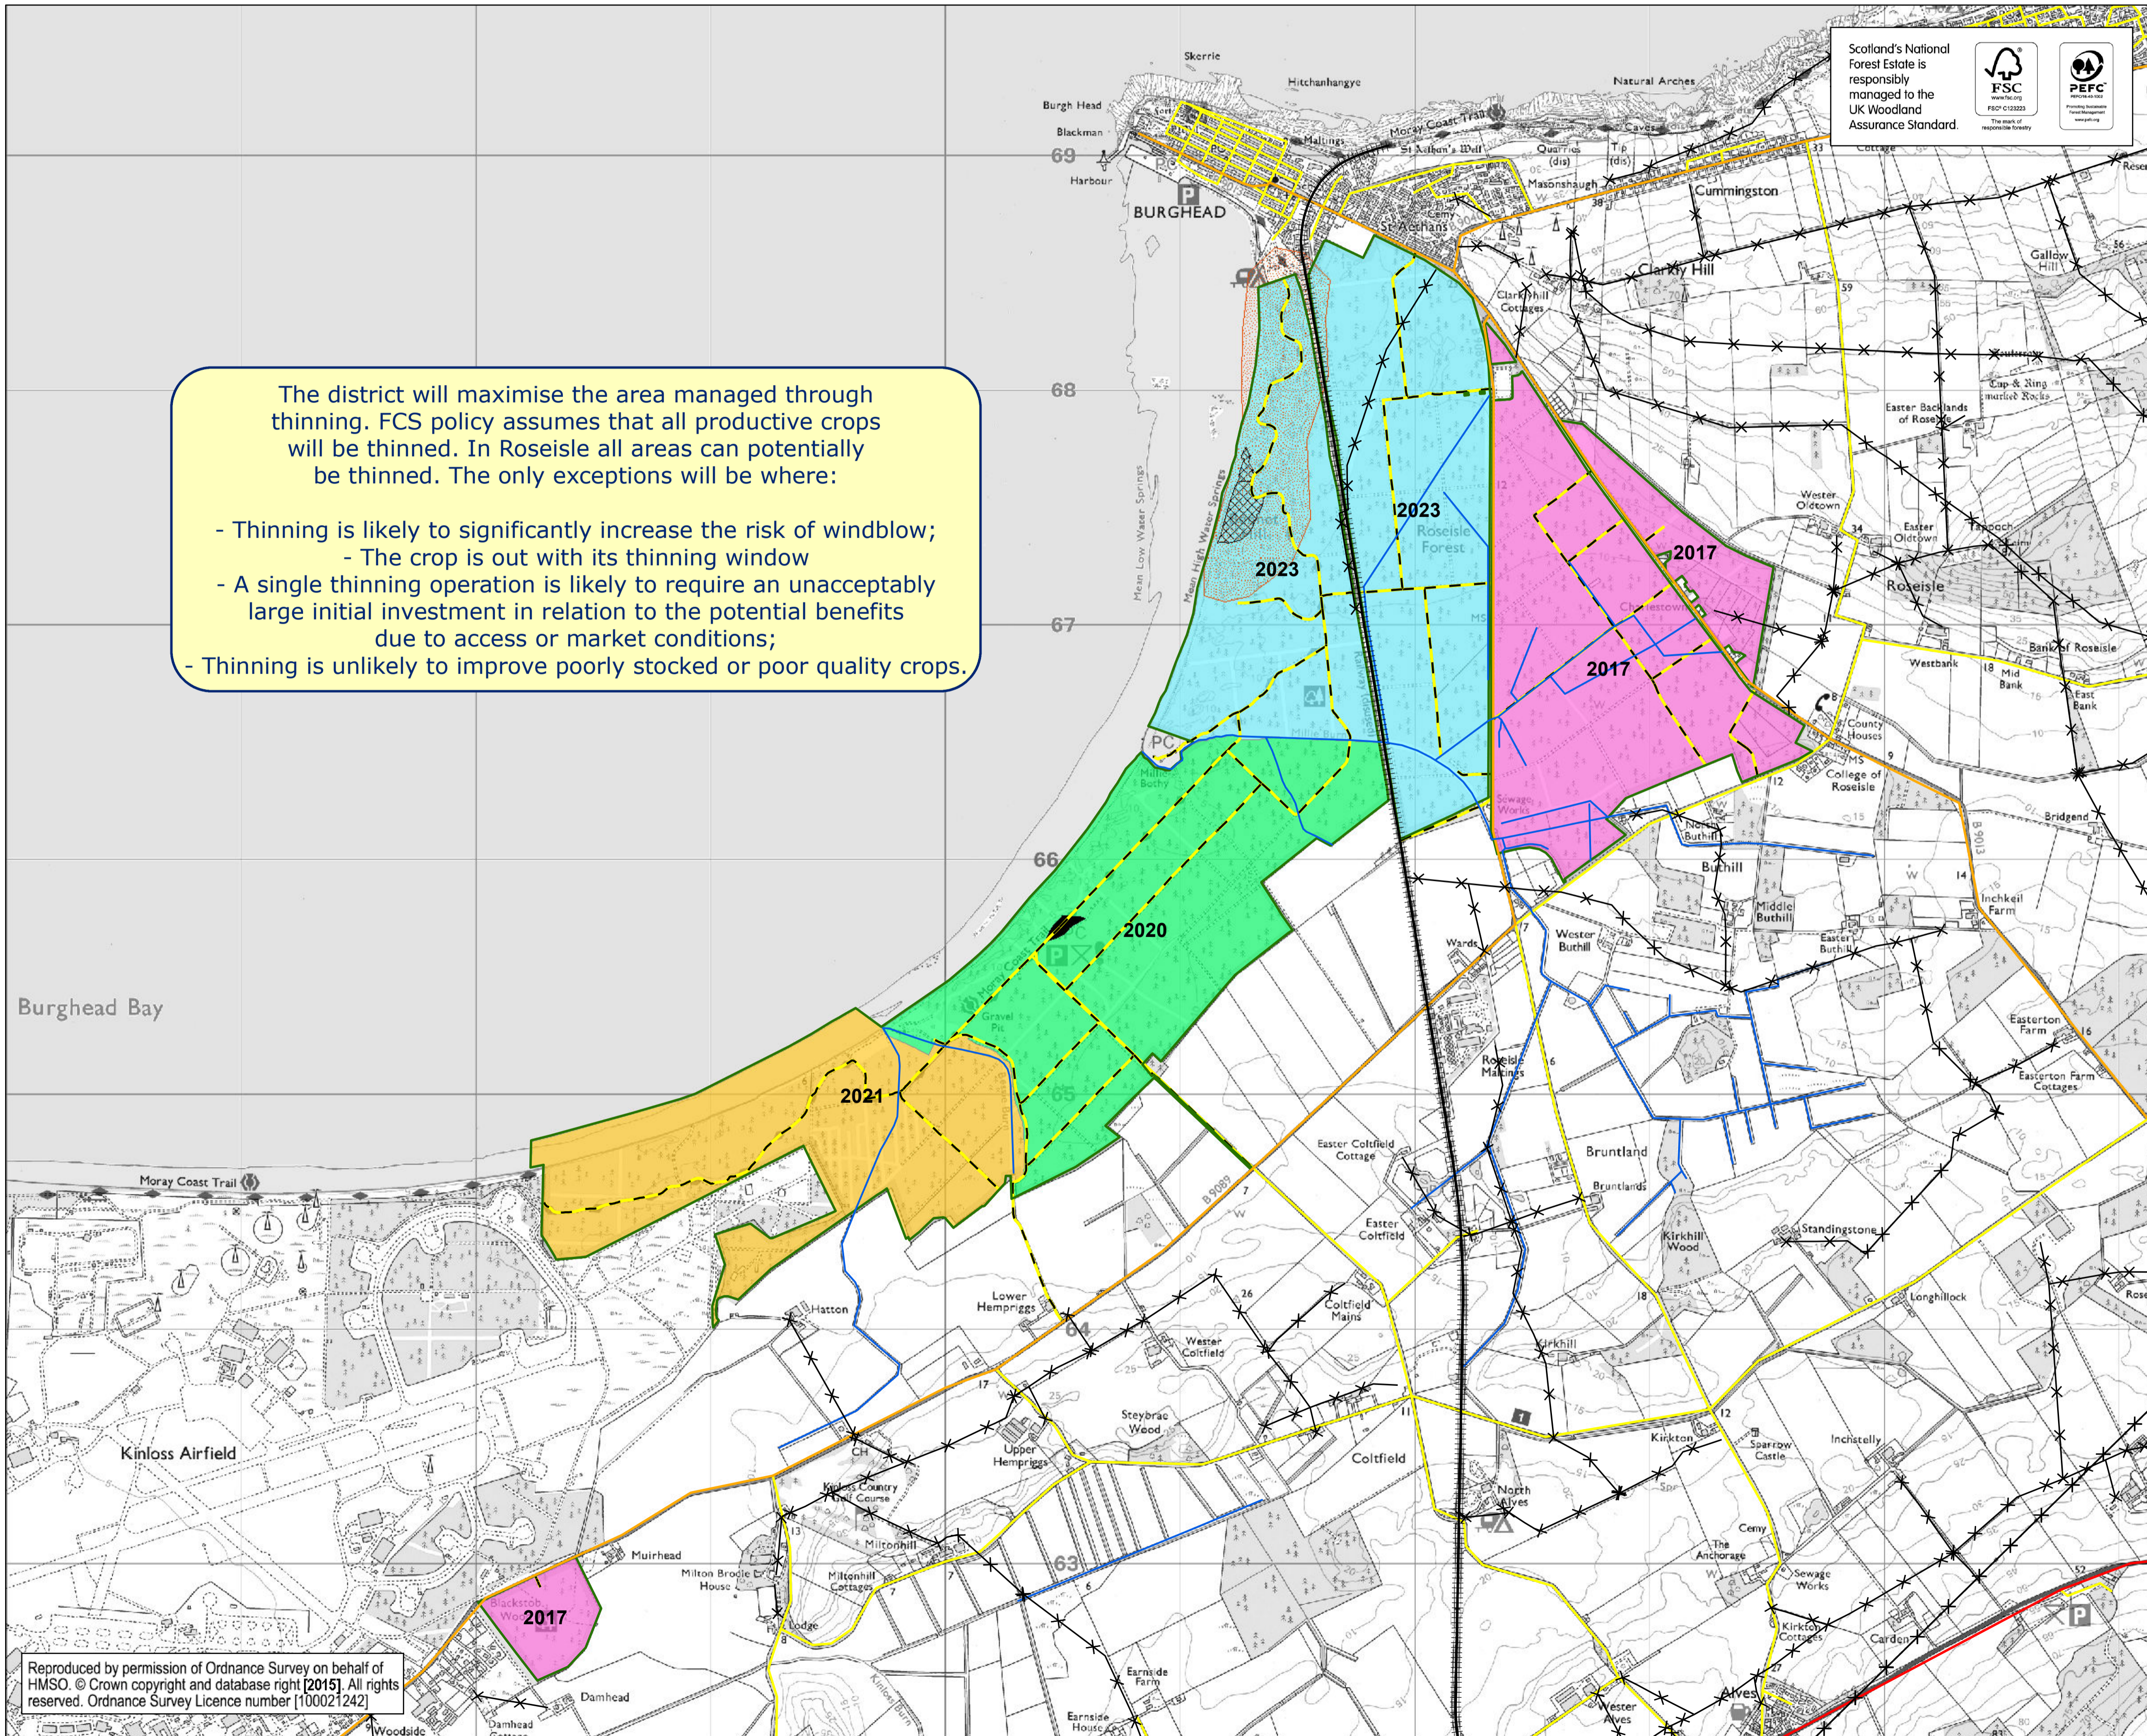

O.S. Grid Ref NJ 114665

Date July 2015

Scale: 1:15,000 @A2

The district will maximise the area managed through thinning. FCS policy assumes that all productive crops will be thinned. In Roseisle all areas can potentially be thinned. The only exceptions will be where:

- Thinning is likely to significantly increase the risk of windblow;
  - The crop is out with its thinning window
- A single thinning operation is likely to require an unacceptably large initial investment in relation to the potential benefits due to access or market conditions;
- Thinning is unlikely to improve poorly stocked or poor quality crops.
